PROYECT: Photogrammetric survey of the paleontologic site "Museo in situ" in Ambrona (Soria)

Year: 2008

Working team:

Ane Lopetegi Galarraga
Miguel Moreno González
Pablo Pérez Vidiella
Álvaro Rodríguez Miranda
José Manuel Valle

Aims:

Motivated by the project of consolidation of the paleontologic remains exposed, as well as the ground on which they are. We proceed to documentate the site by photogrammetric pairs.

Results:

Plans of the osseous remains in scales 1:50 y 1:20, sorted according to the existing information about each one and representing the terrain by means of contour levels.
