	Monthly payment for extra months (between 0-1024€/month)	1200

INTERNSHIP/PLACEMENT INFORMATION	
Department (in case you want more than 1 trainee, indicate the different departments where they will work)	Hardware/ Software Development
Description of project/activities (in case you want more than 1 trainee, indicate the different projects/activities on which they will work)	We are a medtech Start-up working on a technology for non-invasive, continuous blood pressure measurement, used for peri-operative hemodynamic monitoring. Depending on the skills and enthusiasm of the student, he/she will participate in the development process and work on own projects. Focus is on hardware development, but skills in software development for microcontrollers are highly appreciated. Possible projects include construction of an ECG simulator, construction of test equipment for the production process etc.
COMPETENCES, SKILLS and EXPERIENCE REQUIREMENTS	

Requested profile(s) information (Studies, previous experience, language skills, other skills…)	• Hardware development; knowledge of KiCAD is appreciated but not required • Software development skills in C/C++; knowledge of the MSP430 toolchain is appreciated but not required • Basic skills in biomedical engineering are desirable, but not required
Other commentaries	We reside in Graz, a very livable town in Austria with 300.000 inhabitants. There are some affordable student hostels near the office, not far from the center. Our trainees from this year decided to join flat shares.
