

COURSE GUIDE 2022/23

Faculty 163 - Faculty of Engineering - Vitoria-Gasteiz

Cycle .

Degree GMECAN10 - Bachelor's Degree in Mechanical Engineering

Year Fourth year

COURSE

26002 - English for Industrial Engineering

Credits, ECTS: 6

COURSE DESCRIPTION

This ESP (English for Specific Purposes) course is designed for adult learners at a tertiary level institution. The course has a threefold student-centered goal:

Goal 1.- to increase the knowledge of general English from an upper-intermediate level;

Goal 2.- to develop language skills -general and technical- in different formal communicative situations regarding professional meetings, research, written communication or any other professional and academic contexts;

Goal 3.- to become long life autonomous learners of English who can foresee and sort out linguistic difficulties successfully in a professional and an academic context.

The level of the course ranges between B2+ and C1 of general English. However, having a certificate is not a guarantee of success as the course is very specific in content and tasks. Students who feel that they have a weaker level can adapt if they work hard to catch up.

COMPETENCIES/LEARNING RESULTS FOR THE SUBJECT

Course competencies are based on the degree competence MEC5, which reads:

Students have developed those learning skills necessary to undertake further studies with a high degree of autonomy.

Upon completion of the course, students will have achieved or acquired:

1.- a better command of English (Goal 1)

2.- more fluent communication skills -oral and written (Goal 1);

3.- the ability to modulate language to different registers (Goal 2)

4.- confidence and skills to act as mediators in multilingual settings (Goal 2);

5.- a more pervading understanding of language which is useful to find adequate reference sources (Goal 3);

6.- the appropriate language awareness to excel their language skills beyond bare intelligibility as a professional engineer who needs to liaise with fellow workers both academically and personally. (Goal 3)

CONTENIDOS TEÓRICO-PRÁCTICOS

The course consists of three types of topics that take place in alternation.

PRONUNCIATION: FROM PHONEMES TO INTONATION

This block focuses on the sounds of the English language with a view to apply phonetic knowledge to both pronunciation and oral comprehension. The units consist of:

• the symbols of the English phonemes;

• vowels: long, short, diphthongs, the relevance of the schwa sound;

• consonants: voiced and unvoiced;

• speech and phonological processes:

o the pronunciation of -ed forms of regular verbs;

o elision of /d/ and /h/;

o the pronunciation of words ending with the s letter;

o connected speech processes: catenation and linking sounds;

o silent letters;

o merging sounds;

o other significant processes: strong and weak forms, stress in words, compound words and in sentences

ENGINEERING RELATED TOPIC UNITS

The backbone of the course is the set of topic units listed in our textbook (see the bibliography below). In each lesson we will focus on several engineering issues while nurturing our listening, reading, speaking or writing abilities.

We will also add extra reading activities and videos.

COMPLEMENTARY ACTIVITIES

Complementary activities that arise from the class activities may include video watching, panel sessions, or students' proposals.

TEACHING METHODS

Mater classes will focus on presenting material, completing the textbook, and proposing activities, while seminars will be dedicated to planning for assignments, rehearsing presentations, drilling pronunciation activities, writing skills, and questions and answers. At times, the elements of adaptive flipped classroom will be used, so some homework may be required prior to the master or seminar classes.

Homework can be assigned as pre- or post master-class activities.

Attendance and active part-taking is compulsory for continuous assessment.

Individual tasks alternate with team-work for both homework and evaluation activities.
Weaker students are welcome to ask for assistance and supporting material.

TYPES OF TEACHING

Types of teaching	M	S	GA	GL	GO	GCL	TA	TI	GCA
Hours of face-to-face teaching	45	15							
Horas de Actividad No Presencial del Alumno/a	67,5	22,5							

Legend: M: Lecture-based S: Seminar GA: Applied classroom-based groups
GL: Applied laboratory-based groups GO: Applied computer-based groups GCL: Applied clinical-based groups
TA: Workshop TI: Industrial workshop GCA: Applied fieldwork groups

Evaluation methods

- Continuous evaluation
- End-of-course evaluation

Evaluation tools and percentages of final mark

- Multiple choice test 20%
- Individual assignments 20%
- Teamwork assignments (problem solving, Project design) 20%
- Oral presentation of assigned tasks, Reading, 30%
- Active part-taking and attendance 10%

ORDINARY EXAMINATION PERIOD: GUIDELINES AND OPTING OUT

The evaluation system is based on continuous assessment by default.

CONTINUOUS ASSESSMENT:

Students will have to hand in or do in class some assignments or tasks, a short test and deliver a presentation. The grade consists of:

Attendance and active part-taking: 10%

Test: 20%

Individual assignments: 20%

Team work assignments: 20%

Presentation: 30%

The assignments may be carried out as homework, in class, individually or in teams. With these, students do not sit the ordinary exam. However, passing all the assignments and requirements are compulsory in order for them to add up to the final grade.

Please bear in mind that ATTENDANCE and taking part in the sessions actively is compulsory and accounts for 10% of the global grade for students who attend all the classes. This is a 60-hour course. Students can miss up to 12 hours.

Please note that very early leavings, late arrivals or intermittent absences from class for no apparent reason will be recorded as half the attendance or an absence, irrespective of the actual time missed. Absences are not compensated in principle. This will apply to late starters by default too, whatever the reason for late enrollment or belated beginning may be. However, it is advisable to inform your professor about the reasons, and provide her with a certificate if possible.

Those who exceed 12 hours of absences will be separated from continuous assessment and may fail if they don't withdraw in due time.

Distinctions may be awarded to students who get a global mark ranging between 9.6 and 10 and have attended 100% of the class hours.

FINAL ASSESSMENT

Students who do not wish to follow a continuous assessment have to opt out of it by forwarding their renounce in written form to their professor. If they do not do it, they may fail the ordinary call.

Please read the renouncement regulations below.

Final assessment students have to study the contents and develop skills on their own and pass a one-off set of 5 exam papers. See the specifications in the following item.

RENOUNCEMENT

<https://www.ehu.eus/eu/web/ekonomia-empresa-fakultatea/azken-ebaluazioa-eta-deialdiari-uko-egitea>

EXTRAORDINARY EXAMINATION PERIOD: GUIDELINES AND OPTING OUT

EXTRAORDINARY EXAM

The ordinary and extraordinary exams are a one-off comprehensive final exam, and are graded according to its own

specifications.

The extraordinary exam is for students who:
• did not pass the continuous assessment; or
• did not pass/sit the ordinary final exam;

The exam is the same for all students and has the same pattern as the final exam, so it consists of 5 sections that must all be passed independently. Failing one section therefore means a FAILED mark in the subject.
The ordinary and the extraordinary exam focuses on the book in its entirety and the contents indicated in this guide.

Go to the bottom of the page to read the final/extraordinary exam details.

MANDATORY MATERIALS

Students must use an ORIGINAL copy of the textbook -new or second hand:

PAUL DUMMETT; Energy English for the Gas and Electricity Industries. Summertown Publishing, 2011

Please note that photocopies or scanned versions of the textbook are not allowed in the class.
The professor may provide students with SUPPORTING MATERIAL, such as photocopies delivered in class, and files or links to resources shared on egela. Please bear in mind that the material available from egela is not a self-study course but supporting/complementary material for the classes

OBSERVATIONS

FINAL/EXTRAORDINARY EXAMS

Students who do not conform to the course requirements or withdraw from the continuous assessment can sit the ordinary and extraordinary exams.

The 5 sections are:

GRAMMAR AND VOCABULARY. Pass mark: 10 out of 20.

Exercises similar to the grammar and vocabulary included in the textbook.

PRONUNCIATION. Pass mark: 10 out of 20.

Exercises about the basic concepts of pronunciation indicated in the contents of the course (see above).

LISTENING. Pass mark: 10 out of 20.

Showing understanding of spoken English by means of note-taking activities, writing summaries, answering questions or completing excerpts.

READING. Pass mark: 10 out of 20.

Showing understanding of written English by means of answering questions, providing synonyms, summarizing ideas in paragraphs or charts.

WRITING. Pass mark: 10 out of 20.

Showing advanced writing skills and knowledge by means of writing compositions regarding technical topics -essays, reports, emails, opinions, descriptions- and completing exercises about text features -paragraphs, fields in messages, signposting, register.
