MASTER IN THEORETICAL AND EXPERIMENTAL LINGUISTICS

www.ehu.eus

INTRODUCTION AND OBJECTIVES

The Master's Degree in Theoretical and Experimental Linguistics offers a general and unifying view of Linguistics. Its aim is to provide students with the competencies required for the study of both theoretical and experimental Linguistics. It allows students to specialise in the areas of Phonetics and Phonology, Syntax and Morphology, Semantics and Pragmatics, Typology, Historical and Comparative Linguistics, Psycholinguistics and Neurolinguistics. Due to its unifying character, it also promotes interdisciplinary research work in any combination of these areas from both a synchronic and a diachronic perspective.

Students who complete the Programme of Studies will be able to engage in the study of any language (with the added value that it offers the possibility of in-depth study of the Basque language). Importantly, the Master is fundamentally oriented towards research work leading to further doctoral studies.

English friendly master: Students must be able to follow classes in Spanish, but they will be allowed to be evaluated in English.

ENTRY PROFILE

Prospective students are expected to have basic knowledge of Linguistics, as provided by the Degrees in Philology, Modern and Classical Languages, Linguistics and Translation and Interpreting. Students with other degrees, such as Philosophy, Logic, Psychology or Education (esp. Foreign Language), must have shown an interest in the human language faculty during their studies. Candidates that wish to be admitted to the Programme must include an application essay where they state their motivation for studying Linguistics.

CAREER OPPORTUNITIES

- Research in the fields of theoretical and experimental Linguistics
- University Teaching
- Language Teaching, Language Planning, Formal Language Processing, Speech Pathologies, Automated Translation, Artificial Intelligence, etc.

ABOUT THE COURSE

Teaching venue:	Faculty of Arts (Vitoria-Gasteiz).
Teaching type:	On-site.
Teaching language:	Spanish and English. (English friendly master: Students must be able to follow classes in Spanish, but they will be allowed to be evaluated in English).
Approximate fees:	€1,600-1,800 €
Calendar:	From 15 th September to 15 th June; morning sessions. (From 10.30 to 13.30) and afternoon sessions (from 15.00 to 18.00).

STUDY LOAD

<u>Compulsory Subject Courses</u> 21 ECTS Credits	<u>Optional Subject Courses</u> 27 ECTS Credits	<u>Research Projects</u> 12 ECTS Credits	<u>Total</u> 60 ECTS Credits

TRAINING SYLLABUS

The courses below are taught in the language in which they appear.

Compulsory subjects:

- Fundamentos de Fonética y Fonología
- Fundamentos de Lingüística Histórica y Comparada
- Fundamentos de Psicolingüística y Neurolingüística
- Fundamentos de Tipología
- Fundamentos de Semántica y Pragmática
- Fundamentos de Sintaxis y Morfología
- Metodología de la Investigación Lingüística

Optional subjects:

- Advanced Course in Phonetics and Phonology
- Curso Avanzado en Lingüística Histórica y Comparada
- Advanced Course in Psycholinguistics and Neurolinguistics
- Advanced Course in Typology
- Advanced Course in Semantics and Pragmatics
- Advanced Course in Syntax
- Research Seminar in Language Acquisition
- Seminario de Investigación en Lingüística Histórica y Tipología I: Teorías y métodos
- Seminario de Investigación en Lingüística Histórica y Tipología III: Nuevas perspectivas
- Research Seminar in the Neurocognition of Language
- Research Seminar in Language Processing
- Research Seminar in Formal Linguistics I: Advanced Topics
- Research Seminar in Formal Linguistics II: Latest developments
