

MÖSSBAUER SPECTROSCOPY SPANISH SECTION

This year we have organized two Mössbauer meetings:

- 1) The “1st Iberian Meeting on Mössbauer Spectroscopy, IBERMÖSS-2019”. It was organized between the IBAME representative of Portugal, Joao Carlos Waerenborgh, and myself. It took place the 30-31 of May in Bilbao. It was meant as the first meeting point of the Portuguese and Spanish Mössbauer Communities. It helped us to get to know each other and to strengthen the collaborations between the different teams in order to program future collaborations.

The meeting consisted in two parts. In the first one, each team presented its history, equipment, collaborations and actual research lines of interest. In the second part, there were short talks of the different groups.

In Spain there are actually 8 Mössbauer teams, and 6 of them participated in the meeting. The ones from:

ICMAB-CSIC, Barcelona
UPC, Barcelona
ROCASOLANO-CSIC, Madrid
CSIC-Universidad de Zaragoza, Zaragoza
Universidad de Sevilla, Sevilla
UPV/EHU, Bilbao

The other two groups, due to last moment inconveniences, could not assist the meeting. Indeed, they were the groups from UAM, Madrid and Universidad de Cordoba, Cordoba.

It was decided to give a biannual character to the meeting and the “2nd Iberian Meeting on Mössbauer Spectroscopy, IBERMÖSS-2021” will be organized by Prof. Benilde Costa from the Universidade de Coimbra, in Portugal. It will take place in the second half of January 2021.

- 2) The 10th international “Workshop on applications of Emission Mössbauer Spectroscopy, WEMS 2019” was organized by members of the Mössbauer collaboration at ISOLDE/CERN, and the host has been the Bilbao Mössbauer team and its chair was Dr. Iraultza Unzueta. It took place the 15-17 of July in Bilbao. The aim of the workshop was to review the main findings of the collaboration in recent years and bring together groups with interest in emission Mössbauer spectroscopy for studies in material sciences and biophysics.
