

# Opening the box of Physical Review Letters

**Daniel Ucko**

**Physical Review Letters, American Physical Society (APS Physics)**

**Lugar:** Salón de Grados, Facultad de Ciencia y Tecnología (UPV-EHU, Campus de Leioa)

**Hora y fecha:** 12:00, martes 7 de junio, 2011

## Abstract

Physical Review Letters (PRL) is one of the most prestigious journals in physics. We enjoy a healthy amount of submissions and recently celebrated our 50th anniversary. The inner workings of PRL are however sometimes a bit mysterious to the authors and referees that make the journal what it is. In this presentation I will be talking about the state of the journal, some aspects of the review process, and some new developments at PRL in view of the changing publication landscape, points which I hope will lead to a stimulating question and answer session afterwards.
