COURSE DESCRIPTION

The course "Culture, Leisure and Consumerism" is an optional subject in the module "Structural Processes in Current Societies", which brings students closer to the analysis of current social issues from a sociological perspective. This subject presents the theoretical frameworks and methodological strategies necessary to analyse these topical issues from a sociological point of view. It also introduces the discipline's main debates and lines of research.

COMPETENCIES/LEARNING RESULTS FOR THE SUBJECT

1. Define the objects of study of the sociologies of culture, leisure and consumption, as well as their process of appearance and development as specialized subdisciplines.
2. Specify the theoretical frameworks and methodological strategies of the sociological analysis of these three fields, with particular attention to their interaction, by means of presenting their different perspectives and lines of research.
3. Analyze the social dimensions of cultural, leisure and consumption practices from a sociological perspective. Define the connection of these three variables with relevant social identities.
