

**APPLICATION FORM: GLOBAL TRAINING PROGRAMME 2021-2022 – INTERNSHIP INFORMATION**

CORPORATIVE INFORMATION	
Name of the company	Biodiversity and Development Institute
Contact Person	Les Underhill <span style="float: right;">Email: _____</span>
Location	Country: South Africa
	City: Cape Town
	Address: 25 Old Farm Road, Rondebosch, 7700, South Africa
Sector	Biodiversity, research

PROPOSED INTERNSHIP INFORMATION	
Number of trainees to host	1
Extension time (extra months and salary) OPTIONAL  <i>SEE DOCUMENT: "FORM 2_Global Training 2021 extension preliminary agreement"</i>	Extra months: Unable to do this
	Monthly payment for extra months (between 0-1500€/month)

INTERNSHIP/PLACEMENT INFORMATION	
Department (in case you want more than 1 trainee, indicate the different departments where they will work)	Citizen Science
Description of project/activities (in case you want more than 1 trainee, indicate the different projects/activities on which they will work)	One of the main foci of the BDI is on biodiversity informatics. We primarily produce up-to-date distribution maps for 1000s of species, both animals and plants. Our main source of data is Citizen Scientists. Trainees assist with (1) helping motivate citizen scientists to generate data (a training in project management with volunteers); (2) applying statistical/biological skills in generating summaries of the data, writing up the results for publication in the form of policy briefs or research publications; (3) assisting with fieldwork on breeding productivity of African Black Oystercatchers on Robben Island

COMPETENCES, SKILLS and EXPERIENCE REQUIREMENTS	
Requested profile(s) information (Studies, previous experience, language skills, other skills...)	<p>We are searching for intern(s) (1) with enthusiasm and skills in biodiversity fieldwork (eg oystercatcher research on Robben Island (two days a week from November to March); (2) a passion for citizen science (involving members of the public in the submission of data to projects, and assisting with the coordination of citizen science projects); (3) and eager to learn about the analysis and writing up of biodiversity data into research papers and policy documents.</p> <p>The ideal intern would be a student who has completed a master's degree in some field of biology, and is wanting to develop the skills needed to get into a PhD research project. These experiences will include fieldwork skills, communication skills, and research/analytic skills.</p>

<p>Other commentaries</p>	<p>The core values of the Biodiversity and Development Institute</p> <ul style="list-style-type: none"> <li>• <b>Conservation:</b> Informing, influencing and motivating biodiversity policy development based on sound quantitative and scientific evidence through our commitment to long-term monitoring and analysis.</li> <li>• <b>Partnership:</b> Nurturing partnerships with people, organizations and governments on the African continent to benefit biodiversity conservation and mutual growth.</li> <li>• <b>Empowering:</b> Enabling people to play a meaningful and living role in the science conversation by transforming Citizen Scientists into “ambassadors for biodiversity”.</li> <li>• <b>Openness:</b> Adopting an “Open Access” data sharing paradigm that maximizes the benefit derived from data collectively gathered, and thus advancing interdisciplinary scholarly research and informing conservation needs.</li> <li>• <b>Innovation:</b> Continuing the pioneering work that has made us leaders in Citizen Science.</li> <li>• <b>Education:</b> Providing training and research opportunities to the next generation of scientists, leaders and environmentalists.</li> </ul>

APPLICATION FORM 1

## INFORMATION ABOUT THE COMPANY/INSTITUTION

<b>LOGO</b>	
<b>WEBSITE</b>	<a href="http://thebdi.org">http://thebdi.org</a>
<b>INFORMATION ABOUT THE CITY AND THE AREA WHERE THE COMPANY/STITUTION IS LOCATED</b>  (General information about SECURITY, ACCOMODATION, PUBLIC TRANSPORT...)	<p>The BDI is located in the suburb of Rondebosch, 10 km from the CBD of Cape Town, and one of the city's most sought after suburbs. Cape Town is one of the world's tourist treasures. Rondebosch, and the adjacent suburbs (Observatory, Mowbrary, Rosebank, Claremont, Kenilworth) are, in general terms, the safest parts of Cape Town</p> <p>Previous interns from the Global Training Programme have mainly used Uber to get around. Uber in Cape Town is efficient and safe. I use it a lot myself. Uber works extremely well in Cape Tpnw, and is one of the most sensible and safest ways to travel.</p>
<b>GENERAL INFORMATION ABOUT THE COMPANY/INSTITUTION</b>	<p>The Biodiversity and Development Institute is legally constituted as an NPC (Non Profit Company). It has taken over many of the projects that were run through the Animal Demography Unit. The ADU itself no longer exists, having been closed down by UCT on Professor Les Underhill's retirement. However, he continues to supervise postgraduate students at UCT, through his appointment as a Senior Research Scholar. He is currently lead supervisor of three PhD and two MSc students, so the linkage with the University of Cape Town remains strong</p>
<b>SIZE OF THE COMPANY (EMPLOYEES)</b>	10
<b>NUMBER OF PEOPLE AT THE DEPARTMENT WHERE THE TRAINEESHIP WILL TAKE PLAKE</b>	10
<b>MAIN ACTIVITY OF THE COMPANY/INSTITUTION</b>	<p>The Biodiversity and Development Institute (BDI) is a non-profit company designed to foster research and community action in the fields of biodiversity conservation and social development. The Biodiversity and Development Institute is composed of three departments .The Citizen Science Department seeks to connect people with conservation- and development-related research projects and seeks to help orchestrate that research, disseminate the results, and support community action. This is the department in which the intern is primarily located. The Research Consulting Department seeks to promote rigorous research in conservation and development by providing technical and logistical support to the existing research community. The Research Training Department seeks to train and build the capacity of research professionals across several rungs of the research ladder, including undergraduate students, post-graduate students, field assistants, and early-career scientists</p>

<p><b>A BRIEF EXPLANATION OF MAIN PROJECTS</b></p>	<p>Currently, the main focus of the BDI is on projects involving the mapping and monitoring of animal populations. We concentrate on biodiversity informatics. Unlike many similar groups around the world with a base at an academic institutions, our focus is outwards, and on the communication of results to citizens and policy makers.</p> <p>As an example of this, we have been entrusted with a dragonfly project, for which our main responsibility is not the collection of more and more data, but on “mainstreaming” the dragonflies. In other words, we have to make the dragonflies relevant to a variety of constituencies, and especially increase awareness of them and their importance as indicators of the quality of freshwater across the population as a whole, but also get dragonflies used in policy decisions about biodiversity value of landscapes (eg in environmental impact assessments)</p>
<p><b>PREVIOUS COLLABORATION IN INTERNSHIP/TRAINING PROGRAMMES?</b></p>	<p>Over the years, I have hosted five interns from the Global Training Programme: Eukene Rueda, Maria Gonzales, Idoia Fuertes, Unai Apodaka and Itxaso Quintana.</p>
<p><b>OTHER COMMENTARIES</b></p>	<p>Our experiences with the interns from the Basque Country have been extraordinarily positive. Each one of them has been a superb ambassador for your programme</p>
