(COURSES' DESCRIPTION

MOBILE DEVELOPMENT 2 WEEKS / 2 ECTS

The aim is to design a mobile application from scratch and know its structure and basic elements. Students will learn how to make screen layouts and user interfaces, manage contents, understand mobile applications characteristics (performance, optimization, market segmentation), and develop a simple application for Android or iOS and install on the device.

VIDEO GAMES DEVELOPMENT 3 WEEKS / 3 ECTS

The aim is to design a video game with graphics and sounds. Students will learn how to use the computer components (sound cards, graphic cards) to build up their game which is usually developed for Windows. The offered games are often a replication of those that are very well known in the market and usually most played by students.

CYBER AND INFORMATION SECURITY 2 WEEKS / 2 ECTS

The aim of this module is to expose the students to the client and server side security concepts. Students will understand the major security vulnerabilities associated with web technologies such as XSS, SQL injection, manipulate and fix those vulnerabilities, and deploying a state-of-the-art SSL/TLS configuration on a web server. Topics will include cryptography penetrating testing, digital forensics.

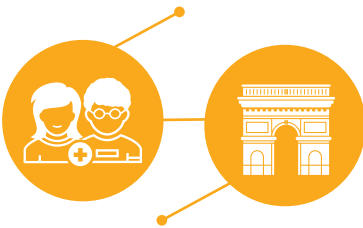

EPITA Summer School programs are taught **in English** and open to students from all over the world who have finished high school and are currently following, at least, a Bachelor's degree program.
