Founded in 1984, EPITA is a bilingual Graduate School of Computer Science. Thanks to its unique pedagogical approach, EPITA trains its students to become outstanding engineers who boast a solid base of scientific knowledge and the most advanced skills in the digital sector.

COURSES' DESCRIPTION

INNOVATIVE PROJECT DEVELOPMENT 2 WEEKS / 4 ECTS

Develop an innovative project over a period of two weeks in a team of 3 to 4 students.

The project must undergo the following phases:

- 1) Select the idea
- 2) Define the specifications and technical needs
- 3) Design, develop and test the prototype
- 4) Validate the specifications and deliverables.

A final presentation will be requested.

VIDEO GAMES DEVELOPMENT 2 WEEKS / 4 ECTS

The aim is to design a video game with graphics and sounds. Students will learn how to use the computer components (sound cards, graphic cards) to build up their game which is usually developed for Windows. The offered games are often a replication of those that are very well known in the market and usually most played by students.

CYBER AND INFORMATION SECURITY 2 WEEKS / 4 ECTS

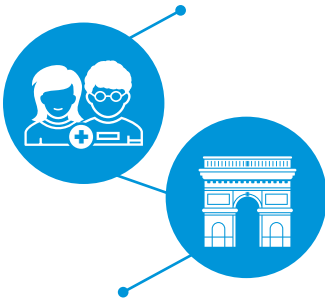

The aim of this module is to expose students to the client and server side security concepts. Students will understand the major security vulnerabilities associated with web technologies such as XSS, SQL injection, manipulate and fix those vulnerabilities, and deploying a state-of-the-art SSL/TLS configuration on a web server. Topics will include cryptography penetrating testing, digital forensics.

INTEGRATION PROGRAM
