Dear international office,

I’m emailing you today to introduce you to INNES Institute Vienna. We offer a range of short summer schools that gives students the knowledge and skill sets required to achieve academic excellence and boost employability.

Schools are taught in English and available in the fields of Design, Business, Sustainability, Architecture, Communication and Environmental Science. They are short term (one to three weeks) academic programs that discuss relevant academic topics and improve participants’ soft skills. For a list of all summer schools please take a look at our webpage: http://www.innesvienna.net/summer-schools.html#summer-schools.

This is an exciting opportunity for your students to experience beautiful multicultural Vienna whilst broadening their knowledge, and earning credits to take back with them to their university course. The tuition fee includes the participation fee and all study materials, as well as a Vienna welcome package. We assist students with finding accommodation, and we also organize an exciting social program.

Our courses range in prices, but so that your students can get an idea for how much it would be, we have calculated an estimated cost for either 1 week, 2 weeks or 3 weeks.

1 week: course price + €360 (accommodation and food)
2 weeks: course price + €540 (accommodation and food)
3 weeks: course price + €685 (accommodation and food)

Attached is a PDF and JPEG poster of our summer schools, perhaps you could forward this onto students or put it on a noticeboard. For general information about accommodation, transport etc. please visit: http://www.innesvienna.net/summer-schools.html

Please note, the deadline for registrations is the 15th April, and if a visa needs to be arranged we strongly suggest that student’s book much earlier.
INTERNATIONAL SUMMER SCHOOLS IN VIENNA

Join our 2 or 3-week interdisciplinary academic summer schools and earn credits while discovering multicultural Vienna. Develop the knowledge and skill sets required to achieve academic excellence and boost your employability. Take part in interactive sessions that include lectures, workshops, discussions, presentations, and project work. Connect with friends from all over the world and enjoy exciting excursions and an optional social program.

All schools are taught in English.
