

BLENDING INTENSIVE PROGRAM

Sustainable and resilient infrastructure and buildings

01 February 2022 – 30 April 2020

Within the **emerging field of Sustainable Cities and Infrastructure**, the University of Antwerp (UAntwerp), University of Girona (UdG), Instituto Superior de Engenharia do Porto (ISEP), University of Minho (UMinho), University of the Basque Country (UPV/EHU), Aristotle University of Thessaloniki (AUTH) and Manipal Academy of Higher Education, India are inviting international students to learn more about newest technologies and sustainability visions how to improve the design, engineering, material selection and construction processes for future cities, buildings and infrastructure such as roads, rivers, tunnels and bridges. During this Blended Intensive Program (BIP) visions, methodologies and best practices are shared and discussed between professors and students virtually as well as face to face in order to set the new horizon for the built environment:

- 1 February 2022 – 12 March 2022: Virtual introduction
- 13 March 2022 – 19 March 2022: International week in Antwerp
- 20 March 2022 – 30 April 2022: Virtual follow-up

Level: Min. 3 BA (min. 120 credits obtained)

Credits: 3 ECTS

Fee: Erasmus students: None (to be confirmed) - Non-Erasmus students: 250€

Deadline registration | 30 November 2021
