

Participants are invited to submit manuscripts based on TECHNART 2017 presentations for possible publication in [Microchemical Journal](#), with the intention of including them in a Virtual Special Issue devoted to TECHNART 2017 conference. All manuscripts must meet the standards of the journal: they will need to show clear analytical advances, not just “novelty” and they must match the scope of the journal.

Virtual Special Issue essentially rules out possible delays in publication for contributors to the special issue and will make this conference special issue more complete and accessible than it has ever been. Please see below its advantageous characteristics:

- All submissions will go through normal peer review process per journal standard;
- Articles will be published individually in regular journal volumes at [Science Direct](#) as soon as they are accepted, which ensures very fast publication speed for individual authors;
- They will also be simultaneously added to the online Virtual Special Issue hosted at Science Direct, which is gradually built up as individual articles are published;
- Articles grouped together in a Virtual Special Issue will retain all their original citation details.

Submission instructions:

- Online submission link: <https://www.evise.com/profile/#/MICROC/login>
- First-time user will need to register first
- Please select the virtual special issue short title “VSI: TECHNART 2017” during submission process
- Please follow step-by-step guide in completing the submission procedure
- Submission deadline: 31st Aug 2017

When preparing your manuscript(s), please carefully follow the journal’s [Guide to Authors](#), which you can find on the [journal homepage site](#). In your cover letter please mention that your manuscript is intended for the TECHNART 2017 virtual special issue.

Please note that all manuscripts will be subjected to the mandatory selection process for this journal, including the strict peer review procedure; therefore acceptance for presentation at the meeting is not a guarantee for publication in the journal.

Thanks for your attention, and we will look forward to your valuable contribution.
