

OUR PROJECT

Fluytec is an Engineering & Manufacturing company with 40 years of experience and numerous worldwide references in Water Filtration since 1979. Our projects' background sums up more than 25 million m³/day of installed capacity globally.

We are specialized in RO Pretreatment Filtration, with a strong dedication to Research and Development of innovative solutions. Fluytec's Engineering department, which is behind the design and development of new patents and proprietary technologies, is now ready to incorporate a new member for a fast growing and dynamic project with an ambitious future perspective.

We are looking to incorporate a Junior Profile to our Engineering Department based in the surroundings of Bilbao.

If you are a highly motivated professional, willing to startup a career in the Water Treatment Industry, contact us by sending your application to: info@fluytec.com
