Academia Practice

Collective

Individual

We cannot consider individual harm without embedding it in a collective harm

“I am because WE are”

Ubuntu philosophy

THERE IS AN URGENT NEED TO...

Have an active **care**

Advocate for a **multispecies attentiveness**

Imagine **forms of response** that transcend the merely punitive

Propose **alternatives** with **transformative capacity**

Open spaces where the word circulates, care is practised and
conflict/harm is not silenced, but addressed collectively and restoratively
