CAMPUS OF
INTERNATIONAL
EXCELLENCE

The Basque Country's success and scientific and technological progress are underpinned by UPV/EHU, a vibrant 30-year-old institution with 45,000 students, 5,000 world-class academic staff and state-of-the-art facilities.

We are the main research institution in the Basque Country, carrying out 90% of the basic research made in that territory and taking advantage of the good industrial environment that the region constitutes.

The University of the Basque Country was labeled as "Campus of International Excellence", highest quality award, by the Spanish Minister of Education

Research
as the bedrock of our activity.

We seek to extend our international influence working on a 'brain-gain' basis and establishing cross-border campuses.
